Dear Ms. Norman:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration. Please note: CDRH does not evaluate information related to contract liability warranties. We remind you, however, that device labeling must be truthful and not misleading.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA’s issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act’s requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Parts 801); medical device reporting (reporting of medical device-related adverse events) (21 CFR 803); good manufacturing practice requirements as set
forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). For questions regarding the reporting of adverse events under the MDR regulation (21 CFR Part 803), please go to http://www.fda.gov/MedicalDevices/Safety/ReportaProblem/default.htm for the CDRH’s Office of Surveillance and Biometrics/Division of Postmarket Surveillance.

You may obtain other general information on your responsibilities under the Act from the Division of Industry and Consumer Education at its toll-free number (800) 638-2041 or (301) 796-7100 or at its Internet address http://www.fda.gov/MedicalDevices/ResourcesforYou/Industry/default.htm.

Sincerely yours,

Mark N. Melkerson -S

Trade Name: Sonoma Fibula Repair System

Common Name: Rod, Fixation, Intramedullary and Accessories

Classification: Class II

Regulation Number: 888.3020

Panel: 87- Orthopedic

Product Code: HSB
Predicate Devices:  
K142945  Sonoma Fibula Repair System  
K071944  Acumed Small Bone Locking Rod System II  
K031438  Acumed Small Bone Locking Rod System II  

Device Description:  
The Sonoma Fibula Repair System includes all implants and 
instruments required for the fixation of fibula fractures and 
osteotomies. The Sonoma Fibula Repair System includes the 
Sonoma Fibula Rod, Sonoma Bone Screws, End Cap and related 
instruments. Sonoma’s Fibula Rod differs from traditional nails or 
rods as it utilizes Sonoma’s ActivLoc® fixation gripper system at 
the proximal end of the rod to allow for proximal fixation without 
the use of screws. The implants are composed of 316 stainless 
steel per ASTM F138.

Indications for Use:  
The Sonoma Fibula Repair System is intended for use in the 
fixation of fibula fractures and osteotomies.

Substantial Equivalence:  
The intended use of the subject device is the same as the Acumed 
predicate devices. The indications for use for the subject device is 
limited to the fibula as opposed to additional anatomical locations 
for the Acumed predicate devices. There are no changes to the 
subject components or accessories compared to the predicate 
Sonoma Fibula Repair System (K142945). Thus, the subject 
device is substantially equivalent to the predicate devices.

Performance Testing:  
No performance testing was performed associated with the 
additional indication of osteotomies for the Sonoma Fibular Rod 
System.
