If You Treat Hips Arthroscopically . . .

Hip Distraction System
This novel patient positioning system, with detachable boots and a removable perineal post and pad, allows for an unrestrained dynamic range of motion assessment.

Hip Access Instrumentation
Durable Synergy C-Mount and Eye Piece hip length arthroscopes with a quick connect bridge system provide a simple joint access solution.

Soft Tissue Resection
Curved burs simplify osteochondroplasty procedures.

Hip-Specific Implants and Suture Passers
The self-retrieving Hip Labral Scorpion™ suture passer, adjustable tensioning Knotless SutureTak® and short Hip PushLock® implants make knotless labral repairs low profile and reproducible.

Trim-iT™ Custom Hip Cannulas
These atraumatic, proximally threaded flexible cannulas can be cut to a desired length based on patient specific soft tissue distances.

Capsular Management and Closure
The self-retrieving CapsuleClose Scorpion™ suture passer is designed for fast and simple capsular closure through a single portal.

. . . Think Arthrex.
From patient positioning to tracking surgical outcomes, and everything in between, we offer innovative solutions to help surgeons treat their patients better.
