

You're invited to the ACVS Summit's Hind Limb Arthroscopy, Ventral Hip Approach, and Luxation Stabilization Course

Sponsored by Arthrex Vet Systems

A focused course on canine hind limb arthroscopy, ventral hip approach, and luxation stabilization. The course includes a combination of short, cutting-edge lectures and wet labs at the Arthrex Training Lab Facility in Phoenix, AZ. Participants will perform the described techniques on cadaveric hind limbs and will be instructed and guided through the techniques by experienced and proficient arthroscopists to ensure the participant has grasped the technique being taught.
