Close the top jaw and squeeze the back trigger to advance suture through the tissue.

With the suture captured in the top jaw, retract the Scorpion from the tissue. Release the suture by pulling the suture limbs while squeezing both triggers.

- **Low Profile**: Pass suture in tight spaces with the Knee Scorpion Needle (AR-12990N)
- **Versatility**: Accommodates 2-0 and 0 FiberWire®
- **Efficient**: Pass and retrieve suture in one step through one portal
- **Anatomic**: Angled jaw engineered for the knee joint

Load 1-2 inches of either 2-0 or 0 FiberWire® into the bottom jaw of the instrument and position at desired location.
