**Indications**
JumpStart® antimicrobial wound dressings are intended for the management of wounds to provide a moist wound environment. JumpStart wound dressing is indicated for surgical incisions, partial- and full-thickness wounds such as pressure ulcers, venous ulcers, diabetic ulcers, first- and second-degree burns, donor and/or recipient graft sites, etc.

**Contraindications**
Do not use JumpStart wound dressings on individuals with sensitivity or allergy to silver or zinc.

**Warnings**
Frequent or prolonged use of this product may result in temporary discoloration of the skin in rare occasions.

**Precautions**
- Caution: United States federal law restricts this device to sale by or on the order of a physician.
- Single use only.
- Electron beam irradiation sterilized. Opening the dressing pouch compromises the sterile barrier. Do not use if the pouch is open or damaged prior to use.
- Remove JumpStart dressing prior to a MRI or HBOT procedure and apply a new dressing after the procedure.
- For external use only.
- Do not apply JumpStart dressing in conjunction with topical agents such as antimicrobial ointments, enzymatic debriders, antibiotic creams or ointments, silver- or zinc-containing creams, oxidizing agents or petroleum-based products.
- Secondary dressings should be used as stated in their Instructions For Use.
- The patient should stop using the dressing and consult a physician if allergy, irritation, increased pain, maceration or any irregular skin discoloration occurs.
- JumpStart dressing is not intended to be used on wounds with uncontrolled bleeding.
- Remove JumpStart dressing during energy-based procedures (such as radio frequencies, ultrasound or radiation) where the dressing may interfere with delivery.
- Avoid direct dressing contact with electrodes or conductive gels during electronic measurements (eg, EEG or ECG).
- JumpStart dressing may be used on infected wounds being clinically managed, as an adjunct to the local clinical protocol.
- The safety of daily JumpStart dressing use for longer than 28 days has not been studied.
JumpStart® Antimicrobial Wound Dressing

JumpStart wound dressing is available as a contact-layer and a composite (island) dressing. JumpStart contact-layer dressing should be used under a secondary dressing or bandage (not provided), to keep it in place and help maintain a moist wound environment. JumpStart composite (island) dressing is a 3-layer dressing, comprising a primary contact layer, bioelectric dressing, an absorbent layer and a semi-occlusive outer adhesive layer to keep the dressing in place and help maintain a moist wound environment.
